

Jan Verhoeven

Network specialist at VEDT

jan@verhoeven272.nl

Summary

Being trained as a chemical engineer I shifted my attention towards photographic materials processing and handling, industrial halogen heaters and (most importantly) computer technology.

At the moment I run www.vedt.nl in which I act as the Linux Engineer and dutch importer for Longshine Network hardware.

Another service offered by VEDT is Quality Assurance and Quality Control consultancy and operations.

Specialties

Logical thinking, problem analysis, software design, programming in non-Windows environments, network technology and equipment, Linux engineering. Quality Assurance, Quality Control.

Experience

Postbezorger at TNT Post

September 2009 - Present (5 months)

De halve middag met mijn hand in allerhande gleueven zitten wroeten tot de eigenaar van de gleuf de boel leeg maakt.

Network specialist at VEDT

May 2009 - Present (9 months)

Owner at VEDT

February 2002 - September 2009 (7 years 8 months)

- Linux development and deployment
- Buying and selling of computer equipment
- Importer of Longshine network equipment
- Linux engineer for small and medium sized companies

Quality Assurance engineer at USHIO Europe BV

August 1999 - January 2002 (2 years 6 months)

- Quality Inspection of industrial halogen heaters
- Development of test equipment
- Purchase high purity noble gasses and nitrogen
- Development of company software

Industrial engineering

Owner at A klasse product ontwikkeling

June 1993 - July 1999 (6 years 2 months)

Development and production of bicycle related products

Development of computer hard- and software

Import and export of computer software

Quality Assurance engineer at Fuji Photo Film

November 1984 - September 1993 (8 years 11 months)

5 recommendations available upon request

Education

Digital equipment

VAX and Datatrieve, 1989 - 1990

IHBO Eindhoven

Scheikunde, 1974 - 1979

Interests

Linux, canoeing, bicycles, rabbits, cooking, movies, computer hardware, Modula-2, Niklaus Wirth

6 people have recommended Jan

"Jan, the guy who taught you to combine the job with humour: it fits!"

— **Ton Reynders**, *Coating Inspector Colour Paper, Fuji Photo Film BV*, worked with Jan at Fuji Photo Film

"I know Jan for quite a long time. Actually from our secondary school time in the early seventies. We traveled together to school by bike and on the way we had a lot of fun. Later in Eindhoven we met at the technical college where we studied chemistry. After a few years I switched to chemical engineering in Breda and I lost contact with Jan. By accident we met again at the distribution centre of AH in Tilburg where we both did some production work. I remember Jan as a very intelligent student who although did not manage to achieve his degree. But nevertheless he made it in the real world. His humor is incredible and I have always liked that. We shared the love for classical photography including developing and printing and it is nice to read that he has found a job in the photo industry for quite a long time. The fact that Jan is now working in the computer business does not sound very strange for me. I think this branch is perfect for him. Hans van der Aa, Materials Consultant at Rijkswaterstaat"

— **Hans van der Aa**, studied with Jan at IHBO Eindhoven

"Jan is a very bright out-of-the-box thinker. He comes with solutions one does not expect. He has a good sense of humour, which unfortunately is not understood by everyone. With his strong opinion he will always support the weak and most in need."

— **Hanneke de Jonge**, *Industrial Engineer, Fuji Photo Film*, worked directly with Jan at Fuji Photo Film

"Jan is a very pleasant colleague, honest, interested in many fields of work and as long as I remember, especially at anything related to computers and maths."

— **Carla Jansen**, *Executive secretary, Fuji Photo Film B.V.*, worked with Jan at Fuji Photo Film

"Jan's way of working is different. He sees the world in another perspective, without the blockades of the taught way of thinking. That way a whole universe of possibilities is his part, instead of lots of problems and just a limited amount of solutions. I love his way of free thinking, talking and acting."

And always having fun. The result of this all is, doing business with Jan is solving your problems quick, permanent and at a fair price."

— **Jack Swinkels**, *Process engineer color paper finishing plant, FUJI FOTO FILM bv Nederland*, worked with Jan at Fuji Photo Film

"HP calculators was one of our common interest, but also long deep discussions on everything could happen to us; sometimes with a conclusion, but always with the feeling that I had gained more knowledge about life. I learned that Jan was one of the most intelligent people I ever met, and I am very glad that I could work with him."

— **Bert Bovens**, *Quality manager, Fuji Photo Film BV*, worked with Jan at Fuji Photo Film
